## Mihir Magudia meets with Adam Afriyie MP

---

Speaking at the meeting, Adam said that there is so much that digital currency can do to help small businesses move money around the world. He was impressed that that LEOcoin has secured a lot of merchants around the world and the way LEO is using LEOcoin to solve global financial problems is exactly what thought more businesses should be doing. He added that we must make sure that UK regulation helps and does not hinder this industry, which has so much potential.

Reflecting on the meeting with the Chairman, Mihir said, I was delighted to meet Adam, he is a prominent UK politician who is keen to be a champion for digital currencies. He fully understand the potential of LEOcoin to fundamentally change the way that the world does businesses. He specifically asked us to send him our ideas for how digital currencies should be regulated as he is keen to promote these ideas with the UK Treasury.

This meeting follows very productive engagement that LEO has had with leading UK politicians and other important groups. LEO will be submitting our ideas on digital currency regulation, to help make sure that this exciting global financial revolution is regulated in the right way.
